

# POLYMERIC FILM CRISTAL C4000

2D

MEDIUM TERM

PERMANENT

This PVC film is very easy to cut and weed. It is specially designed for trendy markings on shop windows, in boutiques, bars and restaurants, etc. The polyester liner gives the **CRISTAL** film very high transparency and avoids visual distortion of objects placed behind glass or a window.

### HEXIS ADVICE BEFORE APPLICATION

For best results, we recommend you apply transfer paper to the Cristal C4000 beforehand.

### APPLICATION

To achieve optimal transparency, we recommend using the SHAGFENCE squeegee (see page 184) and the HEXISGEL application gel (see page 207).
