Window decoration for a "dichroic" effect

## Want to give your windows an amazing coloured effect?

*Join the dichroic trend and create a colour-changing effect depending on the light!*

HEXIS offer two new inspiring films for a dichroic effect: **GLASGOW** and **DUBAI**.

Decorators, designers, architects... don't wait any longer to perfect your **renovation** or **design** projects with a modern and contemporary look for home or business.

Transform or reinvent your doors, partition walls, mirrors, windows, shop windows, restaurant fronts, foyers, stairwells and more. Put colour into all your designs!

### Product characteristics

Clear PET films, metallic shades that change depending on lighting and viewing angle

- **DUBAI** (warm shade and bronze sheen):  
60 µm thickness / PET liner, 25 µm
- **GLASGOW** (cool shade and bluish sheen):  
70 µm thickness / PET liner, 100 µm
- **Outdoor** application
- Durability: **2 years** (vertical exposure)
- Removability: **up to 3 months** with no major traces
- Available in 1520 mm x 15 and 30 m

### Product benefits

The **DUBAI** and **GLASGOW** films offer a super trendy solution for **fast and cost-effective decoration** of glass surfaces.

Ideal for **short-term projects**, these films can be easily removed without leaving major traces or residues.

Transform your glass surfaces and flood your spaces with colour.
